# THE SOLAR SYSTEM

The Solar System is a collection of the sun, 8 planets, dwarf planets, moons, asteroids, comets, and meteoroids.

Use play dough to build the solar system below:

# THE SOLAR SYSTEM: PLANETS

There are eight planets in the Solar System.

Color and trace each planet:

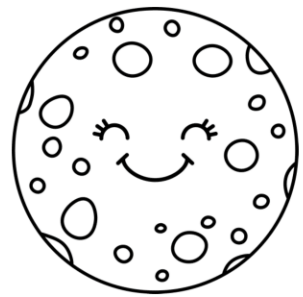

Earth

Jupiter

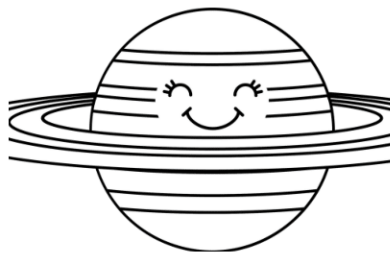

Mars

Mercury

Neptune

Saturn

Venus

Uranus

# THE SOLAR SYSTEM: PLANETS

Can you find all 8 planets?:

# THE SOLAR SYSTEM: PLANETS

Here's how you can remember the order of all 8 planets.

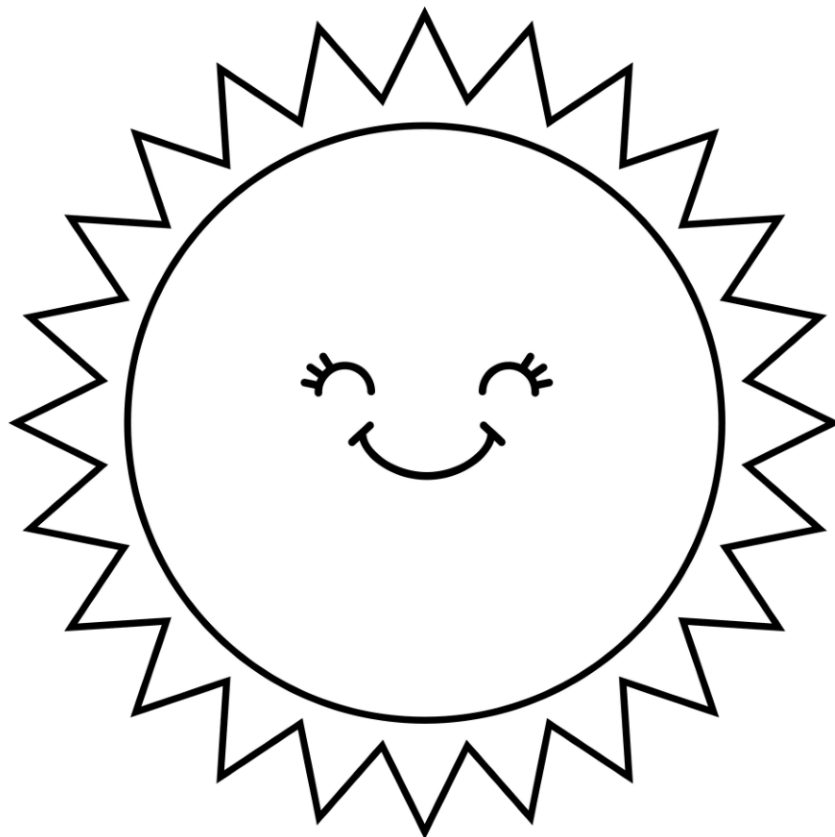

Memorize this sentence while coloring this picture:

MERCURY VENUS EARTH MARS JUPITER SATURN URANUS NEPTUNE

# THE SOLAR SYSTEM: SUN

Trace and complete these facts about the sun. When done, color the sun:

The sun is a dwarf star.

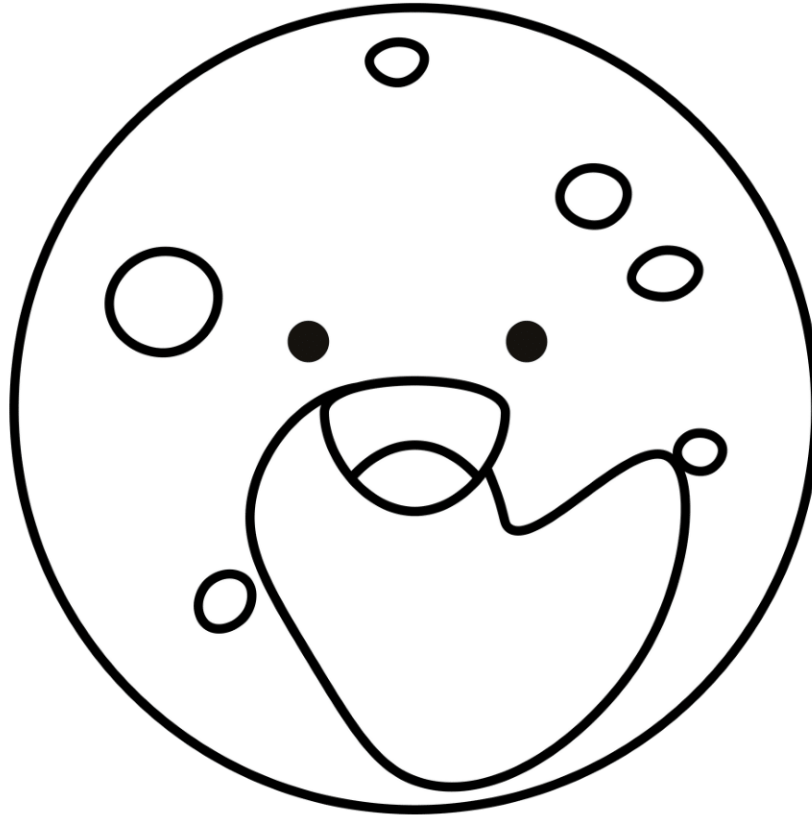

The sun is a ball of glowing gases—92.1% hydrogen  
and 7.8% helium.

The sun keeps the Earth warm. No sun = no life.

# THE SOLAR SYSTEM: KUIPER BELT

Trace and complete these facts about the Kuiper Belt.

When done, color Pluto:

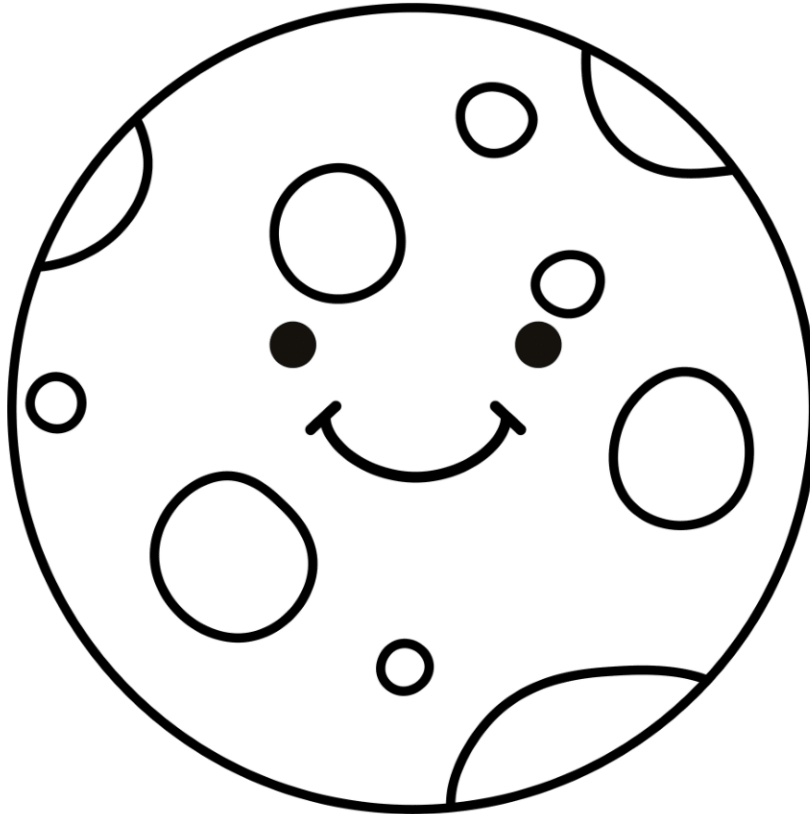

The Kuiper Belt is a donut-shaped region of icy bodies beyond the orbit of Neptune.

Pluto, the dwarf planet, can be found here.

# THE SOLAR SYSTEM: MOONS

Trace and complete these facts about moons. When done, color the Earth's moon:

Moons are natural satellites.

The Earth has one moon.

All the planets have moons except Mercury and Venus.
